

Welding Pressure Gauges

SERIES: P15

Dial: 1½", 2", 2½"

Accuracy: 2.5%

DESCRIPTION

Indumart *P15 Series* Welding Pressure Gauges are applied for welding, cutting and related processes. They are mounted on oxygen or acetylene cylinders or on welding regulators to indicate the gas pressure. Because of the nature of their applications, these gauges meet maximum safety requirements.

Optionally, the *P15 Series* may be ordered with ABS casing.

SPECIFICATIONS

Accuracy 2.5%

Dial Sizes 1½" (40 mm), 2" (50 mm),

2½" (63 mm)

Case Blue or yellow coloured

Steel (std.), ABS (option)

Connection Bottom

Thread 1/8" NPT (11/2" dial),

1/4" NPT (2", 21/2" dials)

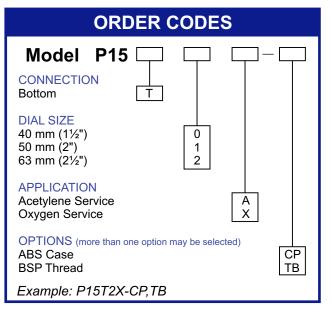

BSP thread (option)

Window Push-on plexiglass
Measuring Element Bourdon or helical tube;

Brass

Range 0...10 to 0...8000 psi;

0...60 to 0...60000 kPa; 0...0.6 to 0...600 bar See the Range Table
